CAREER GOAL

Become a full-time software developer and leverage my unique background in real estate, construction, manufacturing, finance, and e-commerce to create cutting-edge software for a startup in the San Francisco Bay Area.

TECHNICAL EXPERIENCE

Programming:
- JavaScript: Node.js, Express.js
- Python: Django, Flask
- Frontend: Bootstrap, React.js, jQuery
- Database: PostgreSQL, MySQL, MongoDB, Firebase, Redis
- Other: Git/Github, Responsive Design, Web Scraping, AWS, HTML5/CSS3, SASS, ES6+, Lint, Webpack, TypeScript

Design:
- Logo and corporate branding
- Desktop and mobile apps
- Email marketing templates
- Infographics
- Buildings
- Software: Adobe Creative Suite, AutoCAD, Sketchup

MANAGEMENT EXPERIENCE

Strong interdisciplinary management background on large scale projects in both onsite and remote roles. Experienced working with owners, investors, engineers, designers, lawyers, contractors, accountants, banks, and a variety of specialized consultants.

PROFESSIONAL EXPERIENCE

AMA Construct, Inc. | Project Manager & Software Developer *August 2016 - Present*
Nationwide

AMA's primary focus is purchasing and renovating distressed single-family homes and apartment buildings nationwide. I manage new construction projects in California and underwrite, purchase, and renovate properties in Texas and Mississippi. I am also building a web app which is detailed in the below software projects section under Fubakaze.

Row Apparel Inc. | Owner & Software Developer *June 2009 - Present*
Manhattan Beach, California

Row Apparel specializes in the customization of apparel and promotional items. I started the company with my brother in 2009 and have held many positions including graphic artist, sales representative, and project manager. My current position is software developer. Over the last 5 years I have built a number of apps to help streamline business operations which are detailed in the below software projects section.

Caruso Affiliated | Project Manager *June 2008 - June 2009*
Los Angeles, California *2006 and 2007 Summer Internships*

Caruso is a real estate development company that specializes in building and operating high end mixed-use regional centers. My main project at Caruso was the Americana at Brand, a $400m, 15.5 acre, open-air, mixed-use, infill, redevelopment in downtown Glendale, CA. The project consists of 1.3m sf of parking garage, 450k sf of retail and restaurant space, 238 apartments, and a 16-theatre multiplex; all of which are housed in 7 separate buildings surrounding a 2 acre park.

SOFTWARE PROJECTS

Row Apparel | rowapparel.com | 2011 - Present: Think Priceline.com but for blank apparel and promotional items. This web app aggregates and normalizes product information and inventory from over 50 vendors into one easy to use online catalog. Additional features include advanced product search and filtering, content management system, portfolio, and an API to communicate with other services.

Row Apparel IMS | private | 2015 - 2017: Custom web based information management system that handles a project's complete lifecycle from lead generation through accounts receivable including syncing data with Quickbooks. Built on Method CRM's platform.

Bazega.com | private beta | 2011 - Present: Web app that streamlines the development and online sales of products. Integration with PayPal, Google Analytics, Mailgun, and Constant Contact.

Keyedup.io | development | Present: New layer of multifactor authentication that uses a proprietary algorithm to determine a user's authenticity based on how they type their login credentials.

Fubakaze | development | Present: A web app that aggregates real estate data giving investors a new way to discover real estate investment opportunities nationwide.

EDUCATION

University of California, Berkeley - San Francisco, CA
